Primary Teacher SKTM

MATHS HUBS VENN ESSEX

Would you like to feel more confident teaching maths?

This programme supports primary teachers to develop specialist knowledge for teaching maths, building on the primary maths National Curriculum to develop distinct pedagogical decision-making which impacts on classroom practice.

There are two pathways: Number, and Spatial Reasoning. Each pathway consists of the equivalent of four days, spread out over a minimum of two terms. Professional learning and practice development continue throughout, with participants introducing new ideas into their daily practice.

Who can take part?

This programme is designed for primary teachers who want to strengthen their specialist knowledge for teaching maths. It is particularly suited to those who have had limited maths-specific training, or whose training was some time ago.It will be particularly relevant for teachers that have moved phases or teachers that have not received maths-specific training.

APPLY NOW

Benefits

- Your pupils will positively engage with maths that challenges them
- Your pupils will be able to explain their maths and their mathematical thinking using appropriate language.
- You will identify pedagogical approaches that will enhance teaching and learning, and know how to plan for these.
- You will enhance your maths subject knowledge with an emphasis on the key concepts in each mathematical area covered.
