SPECIALIST KNOWLEDGE FOR TEACHING MATHEMATICS (SKTM) PROGRAMMES

**Applications open soon for the following 2025-26 SKTMs
(subject to funding approval)**

SKTM for Primary Early Career Teachers

This programme strikes a balance between developing maths pedagogical knowledge and putting it into practise in the classroom.

This is for teachers in their first or second year of teaching - a very popular programme!

SKTM for Early Years Teachers

A fabulous programme for Early Years teachers and practitioners who would like to develop their specialist knowledge for teaching maths.

We hope to offer both a *Spatial Reasoning* pathway (pattern, shape, space & measures) and a *Number* pathway (number and numerical patterns).

SKTM for Primary Teaching Assistants

Perfect for Primary Teaching Assistants who would like to improve their maths subject and pedagogical knowledge. Particularly relevant for new TA's or those who have not received maths-specific training.

SKTM for Primary Teachers

A great programme for Primary teachers looking to improve their mathematical subject knowledge and to understand the pedagogy that underpins the teaching of it. All primary teachers are welcome to apply!
