£50 to secure a teacher place

Up to 10 students can accompany the teacher

BOOK NOW

The Hertfordshire and Essex SLP are excited to offer schools the opportunity to attend our KS3 Climate change student summit in partnership with the University of Hertfordshire and STEMPOINT East. This summit will bring together local and national partners from across the education, research and the wider STEM sectors to enhance teacher and student understanding of the science and implications of climate change. The aim of the summit is to highlight to young people and their teachers the challenges we face but also focus on what possible solutions there are and new future technologies that can help.
