

MENTORING A SCIENCE ITT/ECT

DEVELOPED IN PARTNERSHIP WITH SAFFRON TSH
AND CHILTERN TSH TO COMPLEMENT THE
MENTOR TRAINING PROGRAMME

Mentoring a Science Early Career Teacher (ECT) can feel very different to mentoring other disciplines and comes with its own unique challenges and opportunities. This 2-part session aims to explore some of those challenges and consider how Science mentoring can offer a valuable response to the training entitlement outlined by the Early Career Framework (ECF).

During these sessions, we will:

- Recap of the Early Career Framework (ECF) and how this is placed within a teacher's overall developmental entitlement
- Consider the specific challenges faced by mentors of Science teachers, and how they can be overcome
- Evaluate the different approaches to coaching a new teacher, in the specific context of Science mentoring.

Where – Online

Date - 7th and 22nd
November 2022

Time - 16:00 – 17:00

Cost - £50
