SECONDARY TEACHING FOR MASTERY

Join our hugely successful *Teaching for Mastery* Programme and discover the teaching and learning approach that gives pupils a deep and adaptable understanding of mathematics.

Mastery Development Work Group

Our Mastery Development Work Groups are for state-funded Secondary maths departments looking to develop Teaching for Mastery collaboratively with colleagues from local schools.

They require participation from two maths teachers per school - 'Mastery Advocates' - who join a Work Group led by a Local Leader in Maths Education. This Work Group meets regularly to develop professional knowledge and expertise, and receive bespoke support.

For participants from Special Schools we also offer Teaching for Mastery Development Communities that provide additional support.
