

Digest Club

Education Visions

Monday 13 June 2022

4:00-5:00pm

Free online event

Prof Emily Shuckburgh

Director, Cambridge Zero

Professor of Environmental Data Science

Over the coming decades, global society will face increasing challenges arising from the threats such as social inequality, climate change and environmental degradation, as well as a wide range of societal trends. This talk will discuss how a new vision for education could be centred on equipping young people with the skills to navigate and lead positive change through the rest of this century and beyond. The purpose is to inspire new possibilities in classroom practice – curriculum development, resources and pedagogies by providing new insights into the complex global problems.
